# MILAGRES COLLEGE

## OUR MOTTO

Led by the Divine Light

## OUR VISION

To transfer youth into responsible citizens and competent professionals through quality education and research

## COLLEGE ANTHEM

1. 'Stella Duce' Our motto high up we hold  
Under her great mantle our hearts grow bold  
Never shall we falter on the way  
Neath her gracious, kindly sway.  
Ch: Onward youth, you all, with faces bright  
Hold aloft the torch of light  
March on to paths of peace and true glory  
Ever in mind your great destiny.
2. To God on high all praise and thanks be given  
For the favours showered on us from heaven  
Now let our anthem ring out loud and clear  
Beckoning youth to spread its message far and near.

## THE LUMINARIES

### FOUNDER & ARCHITECT OF MILAGRES COLLEGE

Born at Kodiyalbail, and ordained Priest in 1910, he founded the Milagres College in 1967 at the age of 83. He was a great Shepherd of Souls, a Builder of the Houses of God and Temples of Learning, Part and Parcel of Kallianpur, effecting a complete metamorphosis of it. The spiritual and educational edifices erected by him are abiding monuments to his sacred memory, earning for him the distinguished name of 'Maker of Modern Kallianpur'. The people of Kallianpur remain ever grateful to him.

### CO- FOUNDER OF MILAGRES COLLEGE & ILLUSTRIOUS SON OF KALLIANPUR

Born at Trasi and ordained Priest in 1931, he was the Vicar General and Vicar Capitular of the Diocese of Mangalore from 1959 to 1972 and 1964 to 1965 respectively. He was a Good Samaritan, a great lover of humainty who offered himself unreservedly in sacrifice to serve, feed and lead his flock to ever-green and new pastures. He was an unflinching support to the octogenerian Founder in the establishment of Milagres College. A builder of Souls and edifices, an able administrator, guide and friend, his name is held in benediction by one and all.

## From the Editors' Desk

It is often said, 'Give me a copy of your college magazine, I will tell you about the quality of your college.' I strongly believe in this statement. A magazine carries the contributions which reflect the hidden talents of the student's faculty members of an institution. The magazine also showcases the various academic, curricular and extracurricular activities of the College. The unfolding of the Covid 19 pandemic has brought an abrupt end to education for the academic year 2020-21 due to lockdown. It has been the most challenging and difficult year and will remain in our memories for decades. The theme of the LIV Edition of Annual Magazine MIRACLES 2021 is 'Post Pandemic Economic Stability'

The economies around the world have been hit hard and India has suffered one of the largest contractions with deficiencies evident in both consumption and investment demand which are the main drivers of growth in India in recent times. Therefore, a good fiscal policy will lend a generous helping hand to lead the vulnerable business and household towards economic recovery. India will have to prioritize economic expansion and sustainability to maintain its growth and influence. The country must continue to maintain transformation that supports rapid growth. This will require wide-ranging and systemic sectoral reforms, with strong measures to restore fiscal balance and strengthen the banking system. India will also need to continue making strides to increase competitiveness and the ease of doing business. The country will have to ramp up its infrastructure efforts not only for roads but also for health and education. Amid the ongoing changes, India has a rare opportunity to undertake several policy changes not only to address the short-term public health challenges but also to play a pivotal role to push forward the agenda of employment and economic growth.

On a personal note, this is my last editor's column in MIRACLES Magazine as next year my colleague Mrs Annamma will take over. I thank all those who have contributed in patterning MIRACLES-2021. I extend my deepest gratitude to Principal Dr. Vincent Alva, for his support and guidance. My thanks also to Magazine Committee Members and the Editorial Team for their suggestions and co-operation. I appreciate Miss Surabhi Bhat, III BSc for designing the Cover Page, Mr Anil Danthy for the back page and M/s. Codialbail Press, Udupi for printing this Magazine.

  
Mrs Sophia Dias 

# Principal Speaks

## Let There Be Light

The word “Pandemic” has been used very widely for various reasons. If some people use this word for their gain, some people shiver by the very utterance of the word. Almost two years have passed ever since this word started haunting us. Initially we were lethargic in understanding the impact of this pandemic and when we started realizing the impact, we did lose the life of quite a few of our dear and near ones. The crises posed by this pandemic had its tentacles spread in almost all the spheres.

Educational sector is the one which has been badly affected due to the present pandemic. No need to enforce that education is the only wheel which could make the society move forward positively. But during this pandemic this wheel got stuck in the slush not being able to move forward. Initially every stakeholder was relaxed since it was a new experience for the present generation. Students enjoyed the vacuum as holiday, teachers got some breathing space from the mundane activities and the parents were at fix not knowing which path to tread. The institutions suffered financially and many stopped disbursing salaries to the employees.

Uncertainties loomed over the head like Solomon’s word. People lost their jobs. Spending capacity of the people reduced drastically. Economy started sloping down. Everything started looking gloomy.

They say every tunnel has a bright light at the end. How true! We have bounced back. Things have started rolling back to their original shape. Students are back into the classrooms, teachers have shifted their focus to offline mode from online with a smile on their faces, parents are breathing a sigh of relief.

We cannot take Covid-19 lightly. We need to be extra cautious of this invisible virus since it has umpteen variants. We need to be safe for the safety of others. Let us try to fight the virus amidst all these uncertainties.

  
Dr Vincent Alva
